

Hydraulic Press MDY1500

The MDY1500 is a hydraulic press designed for heavy-duty industrial applications. It features a robust frame, a powerful hydraulic cylinder, and a user-friendly control panel.

Overview

MDY1500 Hydraulic Press

The MDY1500 is a hydraulic press engineered for heavy-duty industrial applications, offering robust performance for pressing, forming, and punching operations. Equipped with a powerful hydraulic cylinder and precise control systems, it ensures consistent and accurate results across various manufacturing tasks. Designed with operator safety and equipment longevity in mind, this machine serves as a reliable and durable asset for any fabrication facility.

Technical Specifications

Model	MDY1500
Suitable Operations	Pressing, Forming, Punching

Features

Key Features

- Robust heavy-duty frame
- Powerful hydraulic cylinder
- User-friendly control panel
- Precise force control system
- Integrated safety mechanisms

Safety Standards

Operator Protection • Equipment Safeguards
