

Hydraulic Pump for Kubota Tractors

This hydraulic pump is designed for Kubota tractors. It provides hydraulic power for agricultural applications.

Product Overview

High-Performance Hydraulic Pump Assembly

This hydraulic pump assembly is a precision-engineered spare part designed to restore and maintain optimal performance in heavy-duty agricultural tractors. Built with high-grade cast iron and aluminum components, it ensures durability and resistance to wear in demanding field conditions. The unit is fully compatible with specific tractor hydraulic systems, offering a reliable solution for maintenance and repair requirements.

Technical Specifications

Precision-engineered hydraulic pump assembly for reliable tractor performance.

Part Number	3C001-82202
Construction Materials	Cast Iron, Aluminum
Mounting Configuration	Flanged port with 4 mounting holes

Compatibility

Compatible Tractor Series

- M704
- M7040
- M5000
- M8540
- M9540
- M9000
- M105
- M1304

Application

Primary Use

Tractor Hydraulic Systems • Agricultural Maintenance • Spare Parts
