

Hydraulic Rebar Cutter

This portable electro-hydraulic rebar cutter is designed for cutting steel reinforcing bars on construction sites. It provides a safe and efficient alternative to manual rebar cutting methods.

Overview

Professional Electro-Hydraulic Rebar Cutter

The RC-20 is a portable electro-hydraulic rebar cutter designed for efficient steel reinforcing bar cutting on construction sites. It features a powerful hydraulic system and durable construction, making it an ideal tool for concrete construction, bridge building, and infrastructure projects. This compact unit offers a safe, motorized alternative to manual cutting methods, significantly improving productivity.

Performance

Rebar Cutting Range

4 mm

Min Diameter

20 mm

Max Diameter

Cutting Speed

3.25 s

Technical Specifications

Power Requirements

Voltage	Wattage
220V	830W
110V	900W

Weight Specifications

13 kg

Machine Weight

17.5 kg

Gross Weight

Machine Dimensions

410 x 115 x 220 mm

Logistics & Compliance

Packaging Details

- Metal Box
- Cardboard Carton
- Carton Size: 460 x 160 x 270 mm
