

Hydraulic Rebar Cutter

This hydraulic rebar cutter is designed for cutting steel reinforcing bars. It features a heavy-duty cutting head with replaceable blades and a safety trigger.

Product Overview

Professional Hydraulic Rebar Cutter

This portable hydraulic rebar cutter is engineered for efficient and clean cutting of steel reinforcing bars on construction and demolition sites. Featuring a heavy-duty cutting head with replaceable blades, it is driven by a high-performance electric hydraulic system for consistent results. Designed with user safety and mobility in mind, the unit includes a convenient carrying handle and an integrated safety trigger.

Technical Specifications

Safety Equipment

- Safety trigger mechanism
- Ergonomic carrying handle

Recommended Use

Construction • Demolition

Power System

Electric motor-driven hydraulic system

Key Features

Portable, Replaceable Blades, Heavy-duty, On-site Compatible
