

Hydraulic Reversible Plate Compactor

The hydraulic reversible plate compactor is designed for soil compaction in construction and landscaping. Its reversible functionality allows easy maneuvering in tight spaces.

Overview

Professional Soil Compaction

The Hydraulic Reversible Plate Compactor is a robust and efficient machine engineered for demanding soil compaction tasks in construction and landscaping. Its powerful hydraulic system delivers high compaction force, ensuring optimal results on granular soils, asphalt, and paving stones. The reversible functionality provides exceptional maneuverability, making it ideal for operating in confined spaces and challenging job site conditions.

Technical Specifications

Machine Type	Hydraulic Reversible Plate Compactor
Primary Applications	Soil Compaction, Asphalt, Paving Stones, Landscaping
