

Hydraulic Rock Breaker - 100mm Chisel, 9-14 ton Carrier

This hydraulic rock breaker has a 100mm chisel diameter, equivalent to Soosan SB50. It can be mounted on a carrier of 9-14 tons and delivers high efficiency.

Product Overview

High-Performance Hydraulic Rock Breaker

This hydraulic rock breaker is a powerful and reliable attachment designed for demanding demolition, construction, and quarrying applications. Featuring a robust construction and an efficient hydraulic system, it delivers high impact energy to break through rocks, concrete, and other hard materials. Its design focuses on maximizing productivity and minimizing downtime, making it a valuable asset for any construction site.
