

# Hydraulic Sausage Filler

This sausage filler utilizes a hydraulic system for consistent and efficient filling. The machine features variable speed control and multiple filling nozzles for versatility.

## ADDITIONAL IMAGES

## Product Overview

### Professional Hydraulic Sausage Filler

The HF Rapid Sausage Filler is a high-efficiency solution designed for meat processing enterprises and commercial food production. Featuring a robust stainless steel construction, this machine prioritizes food sanitation and durability. Its advanced hydraulic pressure system ensures smooth, consistent filling with low noise operation, making it an ideal choice for producing sausages, bangers, and ham sausages.

## Technical Specifications

Body Material	Stainless Steel
Filling System	Hydraulic Pressure
Maintenance Design	Side-hang hydraulic bag

## Key Features

### Performance Highlights

**1 Low**

Noise Level

**1 High**

Efficiency

### Operational Benefits

- Food-grade stainless steel construction
- Large capacity bowl for high-volume production
- Hydraulic system with variable speed control
- Easy-access hydraulic bag for maintenance
- Emergency stop and overload protection

Compliance & Standards	Food Sanitation Compliant, Commercial Grade
