

Hydraulic Shop Press

This professional lifting shop press features an overload limiting device for added protection. Its hydraulic power unit delivers smooth pressing action and easy operation.

Product Overview

Professional Hydraulic Shop Press

This hydraulic shop press provides smooth, controlled pressing action for various industrial and workshop applications. Engineered for safety and durability, it features a heavy-duty all-steel frame with a rust-resistant finish and an integrated overload limiting device. The dual return spring system ensures rapid, precise ram retraction during operation.

Key Features

Features List

- Built-in overload limiting device for added protection
- Hydraulic power unit for smooth pressing action
- Heavy-duty all-steel frame construction
- Rust-resistant protective finish
- Dual return springs for quick and precise ram control
