

Hydraulic Shovel Bucket Tooth with Pin and Adapter

High wear resistance leads to higher production efficiency. It is hard and tough, with high fatigue resistance and high reliability.

Product Overview

High-Performance Excavation Components

These hydraulic shovel bucket teeth, pins, and adapters are engineered for demanding excavation applications, providing exceptional durability and extended service life. Designed to withstand rigorous soil conditions, these components ensure secure and reliable attachment to bucket systems. This comprehensive range of wear parts enhances operational productivity and minimizes downtime across various heavy-duty hydraulic shovel models.

Compatibility

Supported Models

- CAT 6040/6060/6080
- Hitachi EX800/ZX870/EX1200/EX1900/EX2500/EX3600
- Terex/O&K RH30E/D/F, RH40E/D/F, RH90C, RH120E, RH170B/E, RH340
- Liebherr R974/R984/R9250/R9350/R994
- Komatsu PC4000/PC5500/PC8000/PC1800

Supported Shovel Brands

CAT, Hitachi, Terex/O&K, Liebherr, Komatsu

Component Inventory

Available Components

Bucket Teeth • Adapters • Pins • Lip Shrouds • Heel Shrouds • Wear Liners • Corner Shoes

Sample Part Reference

Component Type	Part Number / Identifier
Tooth Point	V81SD, V81RMX, 75SV2SD, 85SV2SD, V71SD
Adapter	6839L-70SV2, 6839R-70SV2, 5897W-70SV2
Wear Liner	ES6697-2, 1BR50, 1BR100, 1BR130, 1B75, 1B150
Pin	V81PN, 75SV2PN-C, 85SV2PN-C, TAP
