

# Hydraulic Spiral Drill Rig

This heavy-duty spiral drill rig is designed for efficient and precise drilling operations. It features a robust mast and hammer system for driving long spiral drills into the ground.

## Product Overview

### High-Efficiency Hydraulic Spiral Drill Rig

The YTZ26 long spiral drill rig is engineered for demanding pile foundation projects in high-rise buildings and urban infrastructure construction. It offers exceptional versatility for various soil conditions, including loose, sandy, and gravelly layers, while ensuring high construction efficiency. With features like low noise, minimal vibration, and synchronous drilling and filling capabilities, this rig is a reliable solution for advanced geotechnical applications.

## Technical Performance

### Drilling Depth Options

- 400mm diameter: up to 30m
- 500mm diameter: up to 28m
- 600mm diameter: up to 26m
- 800mm diameter: up to 22m

### Key Performance Metrics

**48.4 kN.m**

Max Output Torque

**300 kN**

Max Pull Force

**45 t**

Total Weight

## Machine Dimensions

### Operating & Transport Dimensions

State	Dimensions
Operating State	12m x 5.2m x 31m
Transportation State	10.5m x 3m x 3.4m

## Key Features

### Main Advantages

Low Noise, Small Vibration, Multi-function, High Efficiency, Synchronous Drilling
