

Hydraulic Stamping Press

This hydraulic stamping press is designed for industrial applications. It features a robust frame construction and hydraulic cylinders for powerful, controlled pressing force during stamping operations.

Overview

Professional Hydraulic Stamping Solution

This Single Action Hydraulic Stamping Press is engineered for industrial precision and reliability. Featuring a choice between frame and four-column structures, it offers exceptional stability for various metalworking operations. With advanced cartridge valve technology and hydro-mechanical safety features, this machine ensures both performance consistency and operator safety.

Technical Specifications

Working Modes

- Adjusting
- Manual
- Semi-automatic

Available Structures

Frame type, Four-column type

Performance Features

Operational Control

- Presetting stroke
- Presetting pressure
- Adjustable stroke
- Adjustable pressure
- Pressure holding
- Time delay adjustment

Reliability Metrics

- Cartridge valve design for low shock and minimal leakage
- Automatic guideway lubrication
- Hydro-mechanical-electric safety devices
