

Hydraulic Steering Gear for Trucks

This hydraulic steering gear is designed for heavy-duty vehicle applications. It features precision-engineered internal components for smooth operation and reliable steering control in trucks and buses.

Overview

Heavy-Duty Hydraulic Steering Gear

This hydraulic steering gear is engineered for demanding heavy-duty vehicle applications, offering superior steering control and reliability. Featuring a robust cast iron housing and precision-machined internal components, the unit ensures smooth operation and enhanced driver responsiveness. Designed for seamless integration, it provides an ideal solution for upgrading or replacing steering systems in commercial trucks and buses.

Technical Details

Application Compatibility

- Commercial Trucks
- Buses
- Heavy-duty transport vehicles

Model Number	MT-110/4
Part Reference	4411000000
Material Composition	Cast Iron Housing

Features

Performance Features

- Robust cast iron construction for durability
- Precision-engineered internal components
- Durable sector shaft for enhanced control
- Standardized mounting points for easy installation
