

Hydraulic System Fittings and Adapters

These hydraulic fittings connect hoses, tubes, and pipes within hydraulic systems. They enable the flow of hydraulic fluid in high-pressure applications.

Product Overview

Professional Hydraulic System Components

These high-quality hydraulic fittings and adapters are engineered for reliable performance in demanding industrial environments. Designed for secure, leak-proof fluid transfer, these components support essential connections for hoses, tubes, and pipes. They are built to withstand high-pressure applications across sectors including construction, agriculture, and heavy manufacturing.

Technical Specifications

Available Components

- Hydraulic fittings
- Quick connect couplings
- Elbow fittings
- Ferrules
- Hydraulic hose assembly adapters

Thread Standards

METRIC, BSP, JIC

Construction & Quality

Material

Steel • Stainless Steel

Surface Finish

Silver finish with protective caps

Manufacturing Standard

Yes
