

Hydraulic Tilting Concrete Mixer

The JDY350 single horizontal shaft mixer utilizes hydraulic feeding and tilting. It offers short mixing time, low energy consumption and reduced noise.

Overview

JDY350 Hydraulic Concrete Mixer

The JDY350 is a high-efficiency single horizontal shaft mixer designed for professional construction and highway engineering projects. It features advanced hydraulic feeding and tilting mechanisms that significantly reduce mixing time while maintaining low energy consumption and operational noise levels. This robust unit is engineered for reliable on-site concrete preparation and seamless integration with PLD series ingredient systems.

Key Performance Metrics

Mixing Efficiency

350 L

Model Capacity

Technical Specifications

Operation Type	Single horizontal shaft
Feeding System	Hydraulic
Tilting System	Hydraulic

Features

Key Advantages

- Short mixing time
- Low energy consumption
- Low noise operation
- Hydraulic feeding and tilting

Compatibility

System Compatibility	PLD Series Ingredients
