

Hydraulic Tire Bead Breaker

This hydraulic tire bead breaker efficiently separates tire beads from wheels. It features a sturdy frame, a powerful hydraulic mechanism, and adjustable components to accommodate various tire sizes.

Product Overview

Professional Tire Repair Solution

This hydraulic tire bead breaker is a robust tool designed for efficiently separating tire beads from wheels, essential for tire repair and maintenance. Featuring a sturdy frame and a powerful hydraulic mechanism, it provides efficient and safe bead breaking while reducing manual effort. The adjustable components accommodate various tire sizes, ensuring versatility for professional auto shops and maintenance setups.

Technical Specifications

Supply Voltage	220 V
Power	800 W
Temperature Control	Adjustable

Application

Applicable Range

- Vulcanization of small damage
- Tube tires
- Cover tires
- Small size tires

Key Features

Product Highlights

Hydraulic Mechanism • Adjustable Components • Robust Frame • Versatile Application
