

Hydraulic Toe Jack

This hydraulic toe jack offers lifting capacities from 5 to 100 tons. The head part can hold two times more weight than the toe part; for example, a 50-ton head corresponds to a 25-ton toe capacity.

Product Overview

Industrial Hydraulic Toe Jack

This heavy-duty hydraulic toe jack is engineered for demanding industrial lifting applications, ranging from 5 to 100 tons. Designed with a low-profile toe for accessing tight clearances, it offers versatile lifting capabilities from both the top head and the toe. Built for reliability and safety, this tool is an essential asset for machinery maintenance, bridge construction, railway installation, and heavy equipment transport.

Performance Metrics

Load Capacity Ratio

100 tons

Max Head Capacity

50 tons

Max Toe Capacity

Capacity Range

5 tons to 100 tons

Applications

Primary Applications

Machinery Equipment, Bridge Construction, Railway Maintenance, Heavy Loading & Unloading, Automobile Repair

Design Features

Key Features

- Dual-use lifting (Top and Toe)
- Low-profile toe for low clearance access
- Rugged industrial-grade construction
- Stable and reliable hydraulic system
- Simple, durable design

Customization

Yes
