

Hydraulic Toe Jack for Heavy Lifting

Hydraulic toe jacks are designed to lift heavy loads using a low-profile toe. The hydraulic system ensures smooth and controlled lifting, while its compact design allows for easy portability.

Product Overview

Professional Hydraulic Toe Jack

This hydraulic toe jack is engineered for heavy-duty lifting in confined spaces where standard jacks cannot reach. Featuring a compact, low-profile design, it allows for easy access under machinery and equipment with minimal ground clearance. The robust carbon steel construction ensures reliable performance for demanding industrial applications.

Performance Metrics

Toe Lifting Capacity

5 tons

Toe Capacity

Head Lifting Capacity

10 tons

Head Capacity

Technical Specifications

Base Material	Carbon Steel
Design Features	Low-profile toe, Compact structure, Hydraulic operation, Dual-point lifting
Capacity Ratio	Toe capacity is 50% of head capacity

Certifications & Standards

Manufacturing Experience	20 years
