

Hydraulic Toe Jack for Heavy Lifting

This hydraulic jack, also known as a lifting jack or claw jack, is ideal for lifting heavy objects where space is limited. It is made from high-quality steel.

Overview

Professional Hydraulic Toe Jack

This hydraulic toe jack is engineered for heavy-duty lifting applications in industrial and construction environments. Constructed from high-quality steel, it offers exceptional reliability and durability for lifting large machinery. The versatile design allows for lifting from either the top or the claw, providing flexibility where space is limited and clearance is minimal.

Technical Specifications

Maintenance

Low Maintenance

Lifting Points

Top Lift, Claw Lift

Material

High-quality steel

Operational Features

Common Applications

- Construction
- Manufacturing
- Heavy Machinery Maintenance
- Limited Space Lifting

Safety Mechanisms

- Overload Safety Valve
- Controlled Hydraulic System
