

Hydraulic Toe Jack for Heavy Lifting

This hydraulic toe jack is designed for lifting heavy machinery and equipment. Its low-profile toe slips easily under loads, while the hydraulic system ensures smooth, controlled lifting.

Product Overview

Versatile Heavy Lifting Solution

This hydraulic toe jack is an essential tool for lifting heavy machinery and equipment in industrial and construction settings. Designed for stability and ease of use, it features a low-profile toe that slips under loads with minimal clearance. The robust hydraulic system ensures smooth, controlled lifting, while the integrated safety valve prevents overloading for operator safety.
