

Hydraulic Truck Tail Lift Platform

Hydraulic truck tail lift designed for efficient loading and unloading of goods. It features a robust lifting mechanism with hydraulic cylinders and a durable platform suitable for various truck models.

Product Overview

High-Efficiency Hydraulic Tail Lift

This hydraulic truck tail lift is engineered for heavy-duty logistics, providing a seamless solution for loading and unloading goods. Constructed with high-strength Q700 steel, it offers an optimal balance of durability and lightweight design to enhance operational energy efficiency. The system integrates premium hydraulic components and robust safety-focused electronics to ensure reliable, long-term performance under demanding conditions.

Construction & Materials

Structural Materials	Q700 high-strength steel, Alloy cylinder tube, Chrome-plated piston rod
Surface Treatment	Spray molding process for enhanced anti-oxidation, anti-corrosion, and anti-rust protection.

Hydraulic System

Sealing System	High-performance international brand seal
Connection Quality	Italian-engineered fastening joint equipment

Electrical Systems

Compliance	National standard cables, Standardized safety switches
------------	--

Performance Features

Key Performance Advantages

- High-strength lightweight design
- Durable thermal-resistant circuitry
- Advanced anti-rust surface treatment
- High-quality domestic power pack unit
