Product Overview

Professional Hydraulic Tail Lift

This hydraulic tail lift is engineered for heavy-duty commercial logistics, streamlining loading and unloading processes while reducing manual labor. Constructed with high-strength Q700 steel, the platform and lifting arms provide a lightweight yet exceptionally durable solution for various truck models. The system utilizes global-standard sealing and advanced hydraulic components to ensure reliable operation, safety, and long-term performance under demanding conditions.

Technical Specifications

Material Grade	Q700 High-strength Steel
Surface Protection	Anti-oxidation, Anti-corrosion, Anti-rust, Spray Molding

Hydraulic System

Cylinder Components

- Alloy tube raw materials
- Quenching and tempering chrome-plated piston rod
- Global-standard high-performance seals

Connection Quality	Italian fastening joint equipment
--------------------	-----------------------------------

Electrical Systems

System Compliance

National Standard Cable • Overheat Resistant
