

# Hydraulic Vacuum Adjustable Pressure Switch

This hydraulic vacuum adjustable pressure switch is designed for a variety of applications. It features adjustable pressure settings, allowing for precise control in hydraulic and vacuum systems.

## ADDITIONAL IMAGES

## Product Overview

### Robust Pressure Control

The LF20 pressure switch is engineered for extended duty applications, offering a reliable solution for both hydraulic and vacuum systems. This versatile component is factory-set but supports field adjustment to meet specific operational requirements. With a design that accommodates various diaphragms for fluid compatibility and secure connector options, it provides precise pressure monitoring in demanding industrial environments.

## Technical Specifications

### Termination Options

- Metri-Pack connector
- Standard electrical terminals

### Suitable Applications

Pool and Spa, Anti-skid Braking Systems, Water Pump Systems, Dental Air Compressors, Heavy Construction, Off-road Equipment, Industrial Automation

### Adjustment Type

Field adjustable (factory set)

## Key Metrics

### Pressure Specifications

**0.33 MPa**

Max Pressure

**-55 kPa**

Vacuum Rating

## Design Features

### Design Highlights

Extended Duty Cycle • Fluid Compatible Diaphragms • Tight Seal Connector • Compact Design
