

Hydraulic Wire Rope Pressing Machine

This wire rope pressing machine is a new product designed for efficient cable manufacturing. The machine's aluminum metal alloy construction ensures manufacturing size accuracy and a simple, direct structure.

Overview

High-Performance Hydraulic Pressing

The CLH100 is a robust, versatile hydraulic wire rope pressing machine engineered for efficient metal forming and shaping applications. Designed with a powerful hydraulic system, it delivers consistent force for reliable operation in demanding environments. This compact, self-contained unit features precise control valves and integrated monitoring, making it an ideal solution for rolling mill operations and specialized metal forming tasks.

Technical Specifications

Maximum Force

1000 KN
Max Force

Max Working Pressure	63 Mpa
Flow Rate	2.26 ml/time
Oil Storage Capacity	3 l

Capabilities

Pressing Capacity

Operation Type	Max Diameter
Single Pressing	11 mm
Multi-bite Pressing	12 mm

Design

Available Colors

Blue • Green

Model	CLH100
