

# Hydrogen Water Electrolysis Cup

This portable device electrolyzes water to produce hydrogen-rich water. It features a durable design with stainless steel and glass, powered by a rechargeable battery for cordless operation.

## ADDITIONAL IMAGES

## Product Overview

### Hydrogen-Rich Water On-The-Go

This portable hydrogen water electrolysis cup is designed to enhance the antioxidant properties of your drinking water through an efficient electrolysis process. Constructed from durable, high-quality materials including glass and stainless steel, it offers a safe and long-lasting solution for daily hydration. Its compact, lightweight design and rechargeable battery make it an ideal companion for health-conscious users at home, the office, or while traveling.

## Technical Specifications

### Portability

- Compact design
- Lightweight
- Cordless operation
- Carrying strap included

### Materials

Stainless Steel, High-Quality Glass

### Operation

One-button control

### Power Source

Rechargeable battery

## Performance Metrics

### Health Benefits

Antioxidant Properties • Disease Prevention Support • Immunity Enhancement
