

HZS35 Concrete Mixing Plant

The HZS35 ready-mixed concrete mixing plant is a compact and efficient solution for producing high-quality concrete. It features twin-shaft mixers for thorough and consistent mixing, aggregate batching systems for accurate proportioning, and cement silos for efficient storage.

Overview

Compact Concrete Solution

The HZS35 ready-mixed concrete mixing plant offers a compact and efficient solution designed for high-quality concrete production. It is engineered for small to medium-sized construction projects, balancing performance with ease of installation. The system integrates precise aggregate batching and efficient cement storage to ensure consistent output for demanding job sites.

Technical Specifications

Production Capacity

35 m³/h

Theoretical Output

Core Components

- Twin-shaft mixer
- Aggregate batching system
- Cement storage silos
- Automated control system

Ideal For

Small construction projects, Medium construction projects, Ready-mixed concrete

Features

Key Operational Benefits

- Thorough and consistent mixing
- Accurate proportioning of aggregates
- Efficient cement storage
- Easy installation and operation
- Precise control over mixing process
