

I-Type LED Empty Louver

This I-Type LED empty louver is designed for lighting equipment, specifically within the LED lighting category. It provides efficient light diffusion and glare reduction when integrated into lighting fixtures.

Product Overview

Professional Lighting Solution

The I-Type LED Empty Louver is a specialized lighting component engineered to enhance light efficiency and quality in professional environments. Its unique wave-shape design produces soft, natural light while effectively eliminating glare for a more comfortable workspace. This louver features an extremely wide beam angle, allowing for greater spacing between luminaires without compromising lighting uniformity, ensuring flexible layout options.

Application & Use

Suitable Environments

- Large Offices
- Meeting Rooms
- Department Stores
- Specialty Stores
- Showrooms
- Schools
- Hospitals

Design & Construction

Key Features	High Light Efficiency, Wave Shape Design, Anti-Glare, Wide Beam Angle
