

IC Card Toll Collection System for Park Tickets

This IC card toll collection system is designed for efficient park ticket management. It features an IC card reader for processing payments and validating tickets.

Product Overview

Automated Ticketing Solution

The IC Card Toll Collection System is a professional-grade automation solution designed specifically for managing park tickets and entry points. It streamlines operations by integrating an IC card reader for secure payment processing and rapid ticket validation. Its compact, durable design ensures reliable performance in high-traffic environments, helping recreational facilities and parks improve throughput and security.
