

Ice Block Production Machine

This ice block production machine is designed for efficient and reliable ice production. It is capable of producing high-quality ice blocks suitable for various applications, including commercial and industrial use.

Overview

Professional Ice Block Production

This industrial ice block machine is engineered for reliability and high performance, even in challenging tropical and coastal climates. Featuring advanced compressor technology and patented energy economizers, it ensures stable operation and energy efficiency. The unit is designed for ease of use, with a plug-ready installation process and a user-friendly interface for consistent ice production.

Key Features

Operational Highlights

- Plug-ready installation
- Stable running performance
- Easy cleaning and maintenance
- Simple operation controls
- Multiple protective functions for unstable power supply

Environmental Suitability

Tropical Conditions, Coastal Climate

Technical Specifications

Design Standards

Patented Technology • Energy Economizer Equipped

Ice Block Characteristics

Optimized size and weight for easy handling and removal
