

Ice Maker and Crusher Combination

This compact appliance produces both ice cubes and crushed ice. It features electronic controls and a self-contained refrigeration system for home or light commercial use.

Product Overview

Versatile Ice Solution

This compact ice maker and crusher combination is designed to provide dual functionality for both home and light commercial environments. Featuring a self-contained refrigeration system, the unit efficiently produces fresh ice cubes and offers the flexibility to crush ice on demand. With its durable housing and intuitive electronic controls, it serves as a reliable solution for beverage service needs.
