

Ice Maker Compressor Unit

This compressor unit is designed for ice-maker applications. It features robust construction for reliable performance and is compatible with R600a refrigerant.

Overview

High-Efficiency Cooling Solution

This compressor unit is engineered for reliable performance in low-temperature refrigeration applications, including ice makers, freezers, and wine coolers. Designed for energy efficiency and low noise operation, it features integrated vibration dampening to ensure a quiet environment. The unit is optimized for R600a refrigerant, making it an environmentally conscious choice for modern cooling systems.

Technical Specifications

Refrigerant

R600a

Voltage Range

110V-240V

Frequency

60 Hz

Application Type

LBP (Low Back Pressure)

Performance Features

Key Features

- High efficiency
- Reliable operation
- Low noise output
- Light vibration
- Integrated overload protection

Suitable Equipment

Refrigerator, Freezer, Showcase, Wine Cooler, Ice Maker

Certifications

Safety Standards

CE, CB
