

IEC B5 Mounted Three-Phase Asynchronous Motor

This three-phase asynchronous motor is designed for diverse industrial applications. The motor features a robust construction, reliable performance, and energy-saving capabilities.

Overview

High-Efficiency Three-Phase Power

The YE2 series is a robust, energy-saving three-phase asynchronous motor designed for high-performance industrial applications. Featuring a totally enclosed, fan-cooled structure with a cast iron frame, these motors deliver reliable power for equipment like pumps, fans, and compressors. With B5 flange mounting, they offer easy integration into diverse systems, ensuring durability and consistent operation in demanding environments.

IP Protection Class

50 Hz

Frequency

380 V

Voltage

Rated Power Range	0.25 to 430 hp
Efficiency Class	IE1, IE2
Flange Size Range	63 to 355
Mounting Options	B3, B5, B35, B14, B34

Compliance and Quality

Certifications

CCC • CE • ISO 9001:2015

Construction Materials

- 100% Copper Winding
- Cast Iron Frame
