

IEC C13 Power Connector

This IEC C13 power connector is a standard female inlet for appliances. It is suitable for various electric devices and equipment.

Product Overview

IEC C13 Power Connector

The IEC C13 power connector is a high-quality electrical component designed for reliable power transmission in various electronic devices. Built to the IEC60320-C13 standard, this connector ensures compatibility with standard power cables used for computer equipment and industrial electronics. Its robust construction provides a secure and stable connection, making it an essential component for professional power supply applications.

Technical Specifications

Rated Performance

15 A

Max Rated Current

250 V

Max Rated Voltage

Model Number

XR-501R

Standard

IEC60320-C13

Compliance & Customization

Certifications

UL, CUL, VDE, SAA, CCC, ASTA, ENEC

Color Availability

Customizable upon request
