

IEC C15 Appliance Connector

This IEC C15 connector is suitable for various electric appliances. It is designed for devices requiring a secure, heat-resistant power connection.

Product Overview

IEC C15 Appliance Connector

The IEC C15 connector is a high-performance electrical component designed specifically for appliances requiring heat resistance. Built to the IEC60320-C15 standard, this connector ensures a robust and reliable power connection for demanding equipment such as servers, kettles, and other high-temperature devices. It offers versatile power ratings and international approval compliance to meet diverse global market requirements.
