Product Overview

Precision Gauge Series for Lighting Standards

This comprehensive set of lamps and lanterns gauges is engineered to meet rigorous international and national standards, including IEC60061-1, IEC60061-2, IEC60061-3, and related GB standards. Designed for high-precision quality control and compliance testing, these tools are crafted from die steel to ensure durability and measurement accuracy. This series is essential for manufacturers, testing laboratories, and quality control departments needing to verify lamp cap dimensions, tolerances, and functional parameters.

Standards Compliance

Applicable Standards

IEC60061-1, IEC60061-2, IEC60061-3, GB17935, GB17936, IEC61184, GB1312

Technical Specifications

Included Gauge Functionality

- Go Gauges
- Not-Go Gauges
- Contact-Making Gauges
- Against Accidental Contact Gauges

Construction Material

High-precision die steel
