Product Overview

IEC61032 Figure 1 Safety Test Probe

The IEC61032 Figure 1 Safety Test Probe A is a precision instrument designed for assessing the accessibility of hazardous parts in electrical equipment. Compliant with international standards, this probe simulates human finger access to hazardous parts, ensuring products meet stringent safety requirements. It is an essential tool for manufacturers and testing laboratories to verify product safety and compliance with international standards.

Technical Specifications

Probe Diameter

12 mm
Diameter

Probe Length

80 mm
Length

Material

Stainless Steel

Compliance & Standards

Standards Compliance

IEC61032, IEC60529, UL

Usage & Application

Primary Applications

- Verify basic protection against access to hazardous parts
- Verify protection against access with the back of the hand
- Electrical enclosure safety testing
- Product compliance verification
