

# IGBT Soft Switch Inverter CO2 Gas Shield Welding Machine

This CO2 gas shield welding machine utilizes IGBT soft switch inverter technology. It is designed for robust performance in industrial welding applications, offering precise control over welding parameters.

## Overview

### Industrial Welding Performance

The IGBT Soft Switch Inverter CO2 Gas Shield Welding Machine is a robust solution engineered for demanding industrial environments. Utilizing advanced inverter technology, it provides precise control over welding parameters to ensure consistent, high-quality weld integrity. Its durable construction is designed to withstand rigorous daily use, making it an essential tool for professional fabrication and manufacturing tasks.

## Technical Specifications

### Model

NBC350

### Technology Type

IGBT Soft Switch Inverter

### Welding Process

CO2 Gas Shielded Welding
