

IH Electric Pressure Cooker with LCD Display

This electric pressure cooker features an induction heating element and a large LCD display. It offers 15 preset functions, a stainless steel pot with non-stick coating, and multiple safety measures.

Overview

Professional Grade Induction Pressure Cooker

This IH Electric Pressure Cooker (Model YBW50-130HKD) is a high-performance kitchen appliance engineered for precision and efficiency. Utilizing advanced induction heating (IH) technology, it ensures uniform heat distribution and accurate temperature control for consistent culinary results. Designed for modern commercial and residential kitchens, it combines a user-friendly digital interface with robust safety systems, including a secure locking mechanism and reliable pressure release.
