

Illuminated Indicator Bulbs for Food Processing Machinery

These indicator bulbs are designed for use in food and beverage processing machinery. They provide visual signals for equipment status and operational feedback.

Product Overview

High-Visibility Indicator Solutions

These illuminated indicator bulbs are specifically engineered for use in demanding food processing environments. Designed to provide clear, color-coded visual feedback, they assist operators in monitoring machinery status effectively. With a durable metallic base and vibrant illumination, these bulbs offer reliable performance for complex beverage and cereal production lines.

Technical Specifications

Suitable Industries

- Food Processing
- Beverage Production
- Cereal Manufacturing

Indicator Function

Visual Status • Machine Monitoring

Available Colors

Blue, Green, Red

Base Material

Metallic
