# Illuminated Multi-Tier Stadium

This is a multi-tiered stadium designed with a circular structure. It features prominent lighting elements, with blue and white lights adorning the upper levels.

## Overview

### Architectural Excellence

This large-scale integrated stadium features a sophisticated multi-tiered design with a reinforced concrete truss structure, reminiscent of a blooming hibiscus flower. With a substantial building area of 115,309 square meters, it is engineered to accommodate up to 60,000 spectators. The facility is designed for both high-capacity events and striking visual impact, highlighted by its distinctive illuminated exterior.
