

Illuminated Rocker Switch

This is a compact, three-terminal rocker switch with integrated illumination. Designed for panel mounting, this switch features a durable plastic housing and a red rocker actuator.

Product Overview

Compact Illuminated Control

The Illuminated Rocker Switch is a compact, panel-mounted control component designed for reliable on/off switching in low-voltage environments. It features an integrated light for clear status indication, making it ideal for equipment control panels. Built with a durable plastic housing and a distinct red rocker actuator, it ensures both longevity and ease of use for various industrial and commercial applications.

Technical Specifications

Terminal Count	3
Terminal Type	Spade-type

Physical Characteristics

Actuator Color	Red
Mounting Type	Panel mounting
Housing Material	Durable plastic

Features

Key Features	Illuminated, Panel Mount, Compact Design, Low-Voltage Compatible
