

Immersion Heater Element 2500W

This immersion heater element is designed for domestic water heaters. It features a U-shaped tubular heating element and flange for secure mounting.

Product Overview

High-Performance Immersion Heater

This 2500W immersion heater element is designed for reliable and efficient water heating applications. Constructed with high-quality red copper piping and a durable brass flange, both featuring nickel plating for enhanced corrosion resistance. It is engineered for standard domestic water heating systems, offering a robust solution for consistent performance.

Technical Specifications

Power Rating

2500 W

Power

Voltage Compatibility

110V, 220-240V

Physical Dimensions

Element Length

40 cm

Pipe Diameter

8/8.5mm

Materials & Construction

Material Composition

Component	Material
Pipe	Red copper with nickel plating
Flange	Brass with nickel plating
