

Immersion Water Heater Element

Immersion heating element designed for domestic water heaters. It features a stainless steel tubular construction for corrosion resistance and efficient heat transfer.

Overview

High-Efficiency Immersion Heating

This immersion water heater element is designed for reliable performance in water heaters and boilers. Constructed from high-quality T2 copper with a durable nickel-plated surface, it ensures efficient heat transfer and corrosion resistance. It supports versatile power outputs ranging from 2000W to 4000W and is compatible with both 110V and 220V-240V electrical systems.

Technical Specifications

Output Power

2000 W

Minimum Power

4000 W

Maximum Power

Voltage Compatibility

- 220V-240V / 50Hz
- 110V / 60Hz

Construction

Materials & Surface	Copper (T2), Nickel-plated
Sheath Diameter	8.25 mm

Compliance & Logistics

Certifications

CE

Packaging Details

Unit	Quantity
Poly bag	1
Carton	50
