

Impact Bit

This impact bit is designed for power drills. It delivers reliable performance for various drilling tasks.

Product Overview

Professional Impact Bits for Automotive Assembly

These high-performance impact bits are engineered specifically for use with power and air tools during motorcycle assembly and maintenance. Designed for durability and precision, they are the ideal solution for tightening and loosening screws in demanding automotive environments. They are particularly optimized for the specific requirements of the South Asian and Southeast Asian markets.

Technical Specifications

Available Lengths

- 36
- 38
- 80

Diameter

8 mm

Compatibility & Usage

Compatible Tools

Power Tools, Air Tools

Primary Application

Motorcycle screw assembly and maintenance

Market Information

Target Markets

South Asia • Southeast Asia
