Product Overview

High-quality wear-resistant blow bar designed for heavy-duty crushing operations.

High-Performance Impact Crusher Blow Bars

These impact crusher blow bars are engineered for demanding applications in mining, quarrying, aggregate processing, recycling, and demolition. Manufactured using advanced metallurgical processes, they offer exceptional wear resistance and durability to minimize downtime. Designed for compatibility with major crusher models, these components provide a cost-effective solution for maintaining consistent crushing productivity.

Technical Specifications

Quality Testing Standards

- Hardness testing
- Metallographic testing
- Spectral analysis
- Mechanical properties testing
- Heat treatment verification

Material Composition

High Chrome, Ceramic Insert, Manganese Steel, Ductile Iron, Titanium Carbide, Tungsten Carbide

Chrome Content

15% - 26%

Logistics & Availability

Certifications

ISO Certified

Annual Production Capacity

30000 tons

Standard Shipping Lead Time

Within 30 days worldwide
