Product Overview

High-Performance Impact Protection

These impact protection gloves are engineered for maximum hand safety in demanding industrial environments. Featuring TPR back protection and double-layered palms with soft microfiber interiors, they provide a balance of rugged durability and comfort. The ergonomic, naturally curved finger design ensures dexterity, while Kevlar double-stitching enhances overall structural integrity for long-term wear.

Key Features

Protective Features

- TPR impact protection on the back of the hand
- Double-layered palm construction
- Soft interior microfiber lining
- Kevlar double-stitched seams
- Naturally curved ergonomic finger design
