

Impact Resistant Safety Helmet

This high-impact resistant safety helmet is designed for optimal head protection in various work environments. It is constructed from durable, lightweight materials and features an adjustable suspension system for a secure and comfortable fit.

Product Overview

Professional Head Protection

This high-impact safety helmet features a V-shape reinforced shell constructed from premium ABS engineering plastics for superior strength and rigidity. Designed for versatility, the helmet includes a secure four-point double-layer mesh lining and a rotary X-shape back ribbon locking structure for an adjustable, custom fit. Its non-vented design ensures reliability across diverse industrial environments, including applications requiring electrical insulation.

Physical Properties

Shell Material	ABS engineering plastics
Shell Design	V-shape reinforced form

Features & Accessories

Compatibility

- Ear muffs
- Face shields
- Dustproof shawls

Suspension Type	Four-point double-layer mesh belt with rotary X-shape back ribbon locking
-----------------	---

Compliance & Standards

Insulation Rating

20000 V Voltage Insulation

Certifications	CE, ANSI
