

Impact Sprinkler Head for Irrigation

This impact sprinkler head is a durable and efficient irrigation solution designed for uniform water distribution. Constructed from high-quality brass, it features an adjustable spray pattern and distance, allowing for customized watering to suit various landscape needs.

Overview

High-Performance Irrigation Solution

The impact sprinkler head is a durable and efficient irrigation solution designed for uniform water distribution. Constructed from high-quality brass, it features an adjustable spray pattern and distance, allowing for customized watering to suit various landscape needs. The impact arm ensures reliable rotation, while the threaded base enables easy installation on standard risers.

Technical Specifications

Key Features

- Adjustable spray pattern
- Adjustable spray distance
- Reliable rotation impact arm
- Standard threaded base

Model Identification

DAFEN • DH • UYT-10

Material

Brass

Suitable Applications

Lawns, Gardens, Agricultural
