

Impulse Heat Sealer

This impulse heat sealer is designed for sealing plastic bags and films. It features an adjustable timer for controlling sealing time based on material thickness.

Product Overview

Professional Impulse Heat Sealer

This impulse heat sealer is designed for reliable sealing of plastic bags and various packaging films. It features an adjustable timer that allows operators to precisely control sealing duration based on material thickness, ensuring consistent results. Built with durable construction, this unit is suitable for both industrial and commercial packaging environments, creating airtight and watertight seals.

Technical Specifications

Sealing Type	Impulse Heat
Control Features	Adjustable Timer, Material Thickness Control

Application Suitability

Seal Quality

Airtight • Watertight

Recommended Use

- Industrial Packaging
- Commercial Packaging
- Plastic Bags
- Packaging Films
