

In-Car Entertainment and Navigation System

This in-car entertainment and navigation system supports various disc formats and has a high-sensitivity digital AM/FM radio. It enables simultaneous navigation and music playback, along with Bluetooth hands-free calling.

Product Overview

Advanced In-Car Entertainment and Navigation

This comprehensive in-car system integrates high-definition navigation, multimedia playback, and advanced connectivity features into a single interface. Designed for seamless user interaction, it supports full touch-screen operation, handwriting input, and voice-guided navigation. With robust compatibility for original car steering wheel controls and reversing camera integration, it offers a sophisticated upgrade for modern vehicle interiors.

Multimedia & Audio

Supported Media Formats	MP3, MPEG4, WMA, JPEG
Audio Customization	Individual control of front, rear, left, and right speaker balance

Radio & Connectivity

Radio System

36 stations
AM/FM Presets

Connectivity

- Bluetooth Hands-free Calling
- USB Playback
- AV Input
- Caller ID Support

Navigation & Interface

Display Technology

TFT High-Definition • Full Touch Screen

Navigation Capabilities

- Built-in GPS
- Handwriting Input
- Voice Navigation
- Simultaneous Navigation and Music Playback

Vehicle Integration

Vehicle Compatibility

- Steering Wheel Control Support
- Automatic Reversing Camera Support
- Automatic Light-Sensing Function
