

# In-Ground Well Light Fixture

This durable in-ground well light fixture features a solid brass construction for corrosion resistance. Designed for outdoor use, the fixture provides upward directional lighting, ideal for illuminating pathways, landscaping, and architectural features.

## Product Overview

### Durable In-Ground Illumination

This in-ground well light fixture is engineered for robust outdoor performance, featuring solid brass construction that ensures exceptional corrosion resistance. Designed to provide upward directional lighting, it is an ideal solution for accentuating architectural features, landscaping, and pathways. Its protective round brass grill and stable cylindrical housing make it a reliable choice for long-term exterior use in wet locations.

## Construction & Design

Material	Solid Brass
Housing Style	Cylindrical
Design Features	Corrosion Resistant, Round Brass Grill, Upward Directional Lighting

## Installation & Usage

### Environment

Outdoor • Wet Location Rated

### Applications

- Pathways
- Landscaping
- Architectural Features
